# **RPD Series**

**The Merit Sensor RPD Series uncompensated packaged sensor** is designed for the application of a wide range of pressures to the backside of the sensing element. The RPD is a flexible platform with excellent media compatibility. Its small, compact design is ideally suited for medical and industrial applications.

COMPANY: Merit Sensor designs and fabricates MEMS piezoresistive pressure sensors at our Utah, USA engineering and fabrication facility. We focus on the customization of technically superior pressure sensors to solve customers' pressure sensing needs for the medical, industrial, automotive and aerospace industries.

TECHNOLOGY: Merit Sensor utilizes a piezoresistive Wheatstone bridge with a chemically etched silicon diaphragm. All products are RoHS compliant.

CAPABILITIES: Merit Sensor designs, engineers, fabricates, dices, assembles and tests all products from a state-of-the-art facility near Salt Lake City, Utah.
